## Environmental design:

- Energy Efficiency
- Microgeneration – renewables
- Material & Insulation specification
- Eco-building specification
- Sustainability Assessments – BREEAM
- Technical handbooks part 6 Energy
- Post occupancy evaluations

## What does EH-3D offer?

Our studio offers consultation and report generation for the built environment. We focus on energy efficient building, sustainability development and efficient lighting design.

## Lighting Design:

- Idea generation - concept rendering
- Fitting selection and detailed equipment schedules
- Lighting reports for planning approval.

## Lighting Reports certify:

- Lux level results
- Raytrace visual renders
- Pseudo results

## BREEAM assessment include:

- Commercial Buildings: Retail, office & industrial
- Design & Post construction stages
- Information gathering
- Design team assistance
- Site visits & pre assessment help

We also offer:

Dynamic thermal simulations: TAS  
SAP & SBEM calculations
